Dear Friends:

In this catalogue I am very pleased to offer a nice selection of Arms and other items from the Famous and well known Albert Foster, Jr. Collection of East Orange, N. J. Many of you who have visited Mr. Foster will recognize various items listed. Most items listed are single pieces, therefore a second choice is desirable when ordering. Other Arms arriving from time to time and your inquiries always invited.

Sincerely,

Richard D. Short

MATCHLOCKS

F-143 European Military Matchlock - Period 1600. 47" octagon and round barrel. 62" overall. Full stock to muzzle, thumb rest in comb of stock. Wood ram rod. Some small worm holes in stock and fore end cracked through in middle but no wood missing. Hinged pan cover. Serpentine operated by trigger. Long large trigger guard. Armorers marks on lock and barrel. Piece is in better than good condition for its age, and very seldom offered. $100.00

CANNON

F-154 Lantaka - Malay Cannon. All Brass 49" overall. 10" swivel and pin attached to the trunnions for mounting either on boats or on land. 5" handle or tube at breech by which to aim the gun. Barrel is part octagon and part round. 1½" bore. Muzzle is flared 4" in diameter. 4½" at breech. Decorated with raised designs around muzzle, trunnions and breech. A fine old piece in very nice condition.....$50.00

F-153 Line Throwing Cannon - All brass barrel 24" long. 2½" bore. 4½" at muzzle 6" at breech. Muzzle loading fired by a fuse. Marked around muzzle "J. G. A. 1894 W. P. F." Iron bound wood mount 30" long, 9" high tapering to 3" at rear. Two large iron handles on each side of mount. Iron hinges over the trunnions for dismounting. Wood block with steps and handle for adjusting elevation. Complete with steel rod 20" long just the size of the bore with place to attach line. Fine condition and a scarce piece.....$75.00

CANNON
(Continued)

F-150 Rapid Fire Gun - 2 barrels 15½" long side by side 1" apart. 6" wood cover over barrels at breech. Breech is 8" long covered with a one piece metal jacket. Overall length 24". Cuts for mount underneath breech and a hook at rear. Chambered for the .30-30 Winchester cartridge. The gun is fired by turning a crank on the left side of breech. Barrels fire alternately. Cartridges are fed into action from a hopper type magazine mounted on right top of receiver (the magazine is missing but the base is part of the receiver). Empty shells are ejected at left top of receiver. Shells are fed directly into three revolving cylinders with compartments shaped to form the cartridge chamber when two cylinders come together. Shells are fired directly from these chambers. Unscrewing crank handle allows entire breech jacket to slide off to the rear exposing the working parts etc. Very finely made and machined works and a very odd type action. Blued barrels. Action case is olive drab color. No name or marks on the gun any place. Probably an American experimental model. Excellent condition throughout.....$50.00

F-151 Rifle Action and Scope - Probably an inventor's model. Scope and action made in same forging. Bolt action with Enfield type bolt handle. Mauser type bolt but odd cocking piece. Safety on right side of receiver like the Enfield. Bolt release on left side. Action is 7¼" long. Two triggers and two trigger guards. Forward trigger releases magazine which forms part of the under part of receiver and is in the form of a half circle. Rotary type as in the Savage and Mannlicher rifles. Chambered for .30-06 or similar cartridge. A 2½" dummy barrel or chamber screwed into the action. Scope is 7 7/8" long. 1½" diameter at rear, ¾" in middle and 1¼" at front. Windage and elevation adjustments near middle with 1¼" brass screw caps. No glass in scope but both ends threaded. Scope is very low on receiver, top of receiver closed and shells are ejected from the right side. Fitted to pistol grip stock by a long bolt from butt of stock. Trap butt plate is unfinished. No markings of any kind. Very well made. Good working order and a very odd piece.....$18.00
